FULL CIRCLE CATTLE CO.

SIXTH ANNUAL

Bull Sale

WEBCAST **DVAuction**

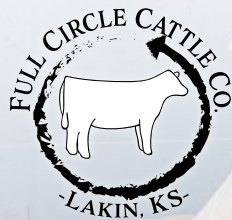

SATURDAY, MARCH 21, 2026 • 1PM
WINTER LIVESTOCK, DODGE CITY, KS

SALE LOCATION:

Winter Livestock, Dodge City, Kansas
1414 E Trail Street, Dodge City, KS 67801

SALE HOSTS:

Full Circle Cattle Co.
Taylor Stabel 620-260-6815
tstabel@kcflc.com

SALE MANAGER:

JWC Marketing LLC
Wes Chism | 281-761-5952
PO Box 39 | Monroe, IA 50170
wes@jwcmarketing.com

AUCTIONEER:

Cody Lowderman, Macomb, IL 309-313-2171

SALE STAFF:

Hadley Schotte, Charolais Journal 785-562-6632
Matt Woolfolk, MRW Cattle Resources 731-694-6469
Donnie Leddy, Cattle Business Weekly 605-695-0113
Matt Caldwell, Stock Exchange 913-755-1105

ONLINE BIDDING & VIDEOS:

Bull videos available of the offering on DVAuction.com

Thank you to our Herdsman,
Heather Evans

GENOMIC TESTING GE-EPDS:

All bulls have been 100K genomically tested and parent verified. These EPDs represent the most up to date data that we can provide at time of print.

DELIVERY:

Free delivery of bulls within 200 miles of the ranch.

GUARANTEES:

All bulls will sell with a one year fertility and structural guarantee.

HEALTH:

All bulls are fertility-tested and will sell with proper interstate health certificates provided by Dr. Kyle Berning of Berning Veterinary Services.

Dehorning services provided by Knowhere Veterinary Service - Savannah Stabel, DVM.

BERNING
VETERINARY SERVICES

ACCOMMODATIONS:

Many hotels in Dodge City are booked due to another event, but we can help coordinate Friday night stays. Call Taylor 620-260-6815.

CATALOG ARTWORK:

Dear Cattlemen,

We are pleased to welcome you to this year's Full Circle Cattle Company Bull Sale on Saturday, March 21, 2026. As in years past, we are proud to present an exciting and competitive set of bulls—each year improving upon the last—representing breed-leading sires and the continued progress of our herd.

As an operation firmly grounded in the beef industry, we understand what it takes to move from the beginning of the cycle all the way through the full circle of production. Whether you are a seedstock producer searching for your next herd-changing breeding piece or a commercial cattleman focused on adding pounds at weaning, we are confident you will find a bull that fits your program.

Full Circle Cattle Co. is committed to the success of our customers, and we stand behind our breeding and development program. As both cattle feeders and seedstock producers, we know what it takes to carry a calf from pasture to plate. We invite you to partner with us on that journey and encourage you to ask about our feeder calf buyback program. If you would like more information about the buyback opportunity, please don't hesitate to reach out to Taylor.

We have been made aware that hotel accommodations in Dodge City may be limited on Friday evening. If you need assistance with lodging arrangements, please contact us and we will be glad to help.

In addition to joining us in person at Winter Livestock, we invite you to participate online through DVAuction. Videos of all bulls will be available for viewing ahead of sale day, and we are always happy to visit with you about the offering. Please contact Taylor or Wes.

We would also like to thank Heather and the entire team behind the scenes at Full Circle Cattle Co. for their hard work and dedication in preparing this year's sale. We are confident you will find quality, value, and genetics that move your program forward.

Make plans now to join us in Dodge City on March 21 for the Sixth Annual Full Circle Cattle Co. Bull Sale. We look forward to seeing you there.

Sincerely,

Full Circle Cattle Co.

FULL CIRCLE BUYBACK PROGRAM

When you buy a bull from Full Circle, you are getting more than just the animal. You are also receiving our time and knowledge to assist with your operation. We primarily started this business to help provide ourselves with a consistent source of feeder cattle. And as we work to create this source of cattle we know our efforts can be mutually beneficial for our customers.

So how does it work?

A few simple criteria...

1. Calves must be sired by Full Circle (FC) bulls.
2. All calves must be vaccinated twice with BoviGold 5 and Vision 7.
3. Calves are NOT required to be weaned, but doing so will add further value.
4. The calves can be marketed either through a local sale barn or by private treaty.
5. All calves must be tagged with an FC ID tag (complementary with bull purchase).

Benefits for You

- The ability to:
 - Retain ownership/partner on your cattle through feeding
 - or Top your local cattle market
- Marketing assistance from FC staff
- Knowledge of your cattle performance from start to finish
- Carcass data on cattle when applicable

BULLS TO CALVES TO BEEF...

Adding value through the Full Circle

FEBRUARY 2026 BREED AVERAGE EPDS:

CE	BW	WW	YW	Milk	MCE	Mtnl	SC	CW	REA	Fat	MB	TSI
11.2	-1.3	64	116	25	9.3	57	1.1	27	0.73	0.016	0.15	269.98

CHAROLAIS EPD DEFINITIONS:

Calving Ease Direct (CE) is expressed as a difference in percentage of unassisted births in first calf heifers. A higher value indicates greater calving ease. It predicts the average difference in unassisted births with which a sire's calves will be born when bred to first-calf heifers.

Birth Weight EPD (BW) The expected difference in average birth weight (pounds) of progeny. Birth weight reflects prenatal growth.

Weaning Weight EPD (WW) The expected difference in average weaning weight of calves. The evaluation reflects the genetic influence on pre-weaning growth rate.

Yearling Weight EPD (YW) The expected difference in average yearling weight of progeny. The evaluation reflects genetic influence on both pre-weaning and post-weaning growth rate.

Maternal Milk EPD (Milk) The genetic ability of a sire's or dam's daughters to express in pounds of weaning weight in her calves due to her maternal ability through mothering instinct and milk.

Calving Ease Maternal (MCE) is expressed as a difference in percentage of unassisted births in first calf daughters. A higher value indicates greater calving ease.

Total Maternal EPD (Mtnl) A value to predict the weaning weight performance of calves from a animal's daughters due to genetics for growth and maternal ability. Total Maternal is calculated by adding 1/2 the WWT EPD to the Maternal Milk EPD.

Scrotal Circumference EPD (SC) The expected difference in scrotal circumference (expressed in centimeters) of a bull's or dam's male offspring at yearling compared to progeny of all other animals evaluated. Research has also indicated a relationship between increased SC EPD and decreased age at puberty for daughters.

Carcass Weight EPD (CW) Expected progeny differences for Carcass Weight is a predictor of pounds of retail product at a constant age endpoint. Selection for increased values should result in heavier carcasses weights at the same age endpoint. Carcass Weight EPD are expressed in pounds.

Ribeye Area EPD (REA) is measured from a cross-sectional area of the longissimus dorsi muscle at the 12th rib. Ribeye area is a major component of the USDA yield grade equation and selection for increased ribeye area should result in larger ribeyes and lower yield grades between animals with the same carcass weight. Ribeye area has a positive relationship with weight, the larger the animal the larger the ribeye area. Ribeye Area EPD are expressed in square inches.

Fat Thickness EPD (FAT) is measured at the 12th rib and is the primary component to the USDA Yield Grade equation. Fat thickness has a negative relationship to cutability; therefore, selection based on decreased fat thickness should result in lower yield grades and leaner cattle given the same age endpoint. Fat Thickness EPD are expressed in inches.

Marbling Score (MB) is a subjective measure of the amount of intramuscular fat in the ribeye muscle. Marbling score is the primary component of USDA Quality grade and selection for increased Marbling Score EPD should result in cattle with higher quality grades at the same age endpoints. Marbling score has a small genetic correlation with fat, therefore producers may select for increased marbling score EPD while not changing external fat thickness when cattle are harvested at the same age-constant endpoint. Marbling EPD is a prediction of the differences in the USDA subjective marbling score between parent's progeny at an age constant endpoint. Marbling is expressed in the same units as the USDA Marbling Score.

Terminal Sire Index (TSI) The AICA Terminal Sire Index (TSI) is a formal method of combining Expected Progeny Differences (EPD) – BW, WW, YW, REA, CW, MARB and FAT – into one single value on which to base selection decisions. The TSI uses estimates of the genetic relationships between traits with an economic default value based on three year rolling USDA data. The TSI represents a dollar index per terminal progeny produced for a bull in the AICA database, ranking them for profit potential.

SIRE OF LOTS 1-6

Our lead off bull is one who reminds you of his sire, the lead off bull in our Inaugural sale and notable AI sire Summit. Perfectly balanced in his makeup, Helios has an impressive depth of rib to compliment his smoothly designed neck to shoulder transition as well as his angular hip and expressively muscled rear third. Balanced in his numbers and backed by a proven BHC bred female, he represents the kind of predictable, performance-driven genetics that can move a program forward with confidence. Top 7% CE and 8% BW.

A ranch favorite Summit son, Lot 2 is powerful in his design while still retaining that front pasture eye appeal. He combines mass and muscle with balance and presence, making him as practical as he is attractive. Backed by the famed Greta cow family he adds a hefty dose of maternal to the mix. Whether you are trying to raise market topping feeder cattle, the next great donor, or show cattle destined for the backdrop we think this one can help you get there. Top 5% Marb, 10% CE, Milk and 20% BW.

Vesuvius was one of the first calves selected for the picture pen and he has it going on! Big boned, solid footed, high volume, with a picture-perfect silhouette. He is the kind you want in the front pasture so the neighbors can see him. His dam, a daughter of Blue Value, was purchased when we first started the purebred herd - turning 12 just before the sale. That kind of longevity and productivity speaks volumes about the maternal strength behind him. You'll appreciate his design, his performance, and the long lasting impact he will have on the operation.

Caesar is a pedigree-proven son of Patriot, backed by a strong Hubert Ranch female that underscores why his sire has been used so extensively throughout the breed. Ranking in the top 25% of the breed for performance at weaning and 5% REA, he offers the kind of growth and consistency commercial cattlemen demand. Powerfully muscled yet smooth in his overall design, Caesar represents the practical, functional kind — built with substance, balance, and the genetic backing to deliver predictable results year after year.

Huge personal performance headlines the offering in Zephyr, Lot 22. He posted an adjusted yearling weight of 1,254 pounds and an impressive adjusted weaning weight of 737 — simply put, he is a meat wagon. Long-bodied and soggy-made with a big, expressive hip, Zephyr has the look of a true revenue generator. His added dimension and capacity suggest pounds at every stage of production. Backed by an elite pedigree stacked with growth and outstanding maternal strength, he combines performance and cow power in a way that's sure to make him a crowd favorite on sale day.

Big power from these Inception sons out of the Brenda 8475 donor. Flushmate sibs to the Lot 22 Zephyr, they are equally stacked - all homozygous polled and ranking in the top quarter of the breed for Weaning and Yearling. Known for terminal prowess, these Inception sons are guaranteed to put the pounds in their calf crops.

Neptune is a big-growth bull we've grown especially attached to. He may have slipped by on picture day, but he absolutely smashed the scales on scan day — proving where it truly counts. Ranking in the top 9% of the breed for Weaning Weight and Yearling Weight, top 25% for Calving Ease, and 30% Marbling, he offers a balanced spread of growth and carcass merit. He posted an impressive 855 pounds adjusted at weaning to ratio 114 and 1,290 pounds at yearling with ratio of 114.

Achilles is our lead off Reputable son and a favorite of ranch visitors. He does everything right. Elegant yet masculine in his design, he packs a punch in the performance category while still keeping that soft, big dimension look we have appreciated out the Reputable sons. His flushmate brother 5068 is no slouch either offering a balanced set of numbers with plenty of consistency to be had with these sibs.

Another opportunity to dive into a set of full brothers and this time they are all Age Advanced! These Justified sons deliver on the performance and growth. Ready to go to work they will add dimension and power to your calf crop. Big middled, soft made, angular, and sound on the move they check the boxes. Pedigree meets phenotype in a balanced package with Justified and Brenda 8475.
